Frage **1**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

Philosophers distinguish different areas of justice. In their text, Frohlich, Oppenheimer and Eavey address...

Wählen Sie eine Antwort:

- a. retributive justice
- b. distributive justice
- c. compensatory justice

Frage **2**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

The title of John Rawls' most famous book is...

Antwort:

Frage **3**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

What is the main purpose of Rawls' „veil of ignorance" thought experiment (in which people are asked to choose a principle of justice while lacking certain information that they normally have)?

Wählen Sie eine Antwort:

- a. to increase the impartiality of people's reasoning
- b. to increase people's motivation to comply with their chosen principle
- c. to increase people's empathy towards the less well-off
- d. to increase people's capacity for imagining alternative (social) realities

Frage **4**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

In their study Frohlich, Oppenheimer and Eavey address certain aspects of Rawls' theory. Which of the following hypotheses do they purport to test?

Wählen Sie eine oder mehrere Antworten:

- [ ] a. People in the original position will be fully self-interested.
- [ ] b. People in the original position will always reach unanimous agreement.
- [ ] c. People in the original position will choose the „difference principle".
- [ ] d. People in the original position will always choose the same principle.

Frage **5**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

Participants could earn real money for completing the study, depending on their choices of income distributions and lotteries that determined their assignment to income classes.

Bitte wählen Sie eine Antwort:

- Wahr
- Falsch

Frage **6**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

Why was it important for the validity of Frohlich, Oppenheimer and Eavey's experiment that the stakes were high, i.e., that from participants' perspective there was a chance to end up being really badly off?

Wählen Sie eine Antwort:

- a. because only then participants will be motivated to take sufficient effort in completing the study
- b. because only then participants' aversity to risks will lead them to reason in favor of the difference principle
- c. because only then sufficient anxiety will be triggered in participants
- d. because only then participants will be able to understand the implications of the underlying principles of justice

Frage **7**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

Please assign each income distribution to one of the principles tested in Frohlich, Oppenheimer and Eavey (the principle that implies this distribution).

Maximizing the average with a range constraint	Auswählen ...
Maximizing the average	Auswählen ...
Maximizing the average with a floor constraint	Auswählen ...
Maximizing the floor	Auswählen ...

Frage **8**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

Across all experiments, which principle was chosen most often?

Wählen Sie eine Antwort:

- a. Maximizing the floor
- b. Maximizing the average with a floor constraint
- c. Maximizing the average with a range constraint
- d. Maximizing the average

Frage **9**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

How often did the groups reach consensus in their choice of principles?

Wählen Sie eine Antwort:

- a. sometimes
- b. never
- c. often
- d. always

Frage **10**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

How many groups chose the principle that Frohlich, Oppenheimer and Eavey associated with Rawls' difference principle (i.e., maximizing the floor)?

Wählen Sie eine Antwort:

- a. some groups
- b. all groups
- c. no group
- d. most groups

Frage **11**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

How did participants' support for maximizing the average with a floor constraint change over the course of the tasks that they were asked to complete?

Wählen Sie eine Antwort:

- a. support for this principle became stronger
- b. support for this principle stayed the same
- c. support for this principle became weaker

Frage **12**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

In Frohlich, Oppenheimer and Eavey's interpretation, participants' choices of income distributions were driven by the attempt to reconcile the following two values or concerns: (1) sufficient welfare for the poor, (2) equality of distributions.

Bitte wählen Sie eine Antwort:

- Wahr
- Falsch

Frage **13**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

From the fact that participants‘ risk propensity, political ideology, salary aspirations and socioeconomic status where not (or only mildly) correlated with their choices of income distributions Frohlich, Oppenheimer and Eavey inferred...

Wählen Sie eine Antwort:

- a. that the original position as a whole, and the veil of ignorance in particular cannot be operationalized in the context of scientific studies
- b. that Rawls' requirement of reaching consensus behind the veil of ignorance was too strong, and hence philosophically untenable
- c. that participants had understood the principles of justice that were entailed by the presented income distributions
- d. that their operationalization of Rawls' veil of ignorance (even in a thick sense) was largely successful

Frage **14**

Bisher nicht beantwortet

Erreichbare Punkte: 1,00

Frohlich, Oppenheimer and Eavey argue that the result of their study contradicts Rawls' claim that people behind the veil of ignorance would reach consensus on the difference principle. The study is hence regarded as providing evidence against this principle. Suppose you wanted to defend Rawls. What could be plausible ways of casting doubt on the study's relevance for an assessment of Rawls' difference principle? In other words, and more generally, what could be criticized about the study?
